### What is VIP Priority Service?

Imagine it's New Years Eve at 10:00 pm, it's freezing outside and your heat suddenly turns off. Our service technician will be there to repair your heat and help you ring in the new year!

**That's VIP Priority Service!**

### Looking After You and Your Home.

At every tune-up, we utilize ultrasonic tank testing to proactively determine if your oil tank is due for a replacement before it leaks and causes a problem. This same technology is used in commercial applications for measuring the corrosion and wear of million-gallon storage tanks.

Ultrasonic tank testing technology is EPA approved to assess the integrity of an oil tank. We can identify the internal thickness of tanks to determine if they are at risk for a leak before they cause major environmental damage. Just one more way SOS provides you peace of mind by looking after you and your home. Plus, should your tank need a replacement, we offer \$500 off a new tank.
